

ENVIRONMENTAL POLICY STATEMENT

We are committed to improving our environmental performance on a continuous basis, including pollution prevention, reduction in our overall impact on the environment and compliance with legal requirements. We monitor and assess our environmental performance on a regular basis.

It is our policy to:

Assess and minimise environmental risks related to our business activities.

Communicate environmental good practice to all employees

Reduce our carbon dioxide emissions

Reduce energy and resource consumption, using sustainable resources where practical

Ensure that the company purchases, stores and uses only materials that minimise the risk of environmental pollution, when working in accordance with the manufacturers' instructions.

Minimise waste generated and ensure that all waste produced by our work activities is segregated, stored and disposed of in accordance with local, national or EC Regulations through a reputable/certified waste disposal company.

Ensure compliance with current and future statutory obligations as directed by the Environment Agency.

Review and revise this statement as necessary at regular intervals not exceeding 12 months

The responsibility for environmental performance, both on our own premises and on site, is a joint commitment and each employee has a duty to engage with and carry out business activities with minimal impact on the environment.
